freesewing-sasha-sa10

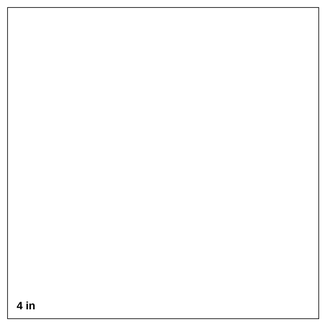

2 pages of A0 (copy shop) · trim and butt

Print at 100% (“Actual size” or “Scale: 100”), never “Fit to page”, on one side of the paper.

Measure the test square before cutting: it must be exactly 10 cm (4 in). If it is not, check the print settings and print again.

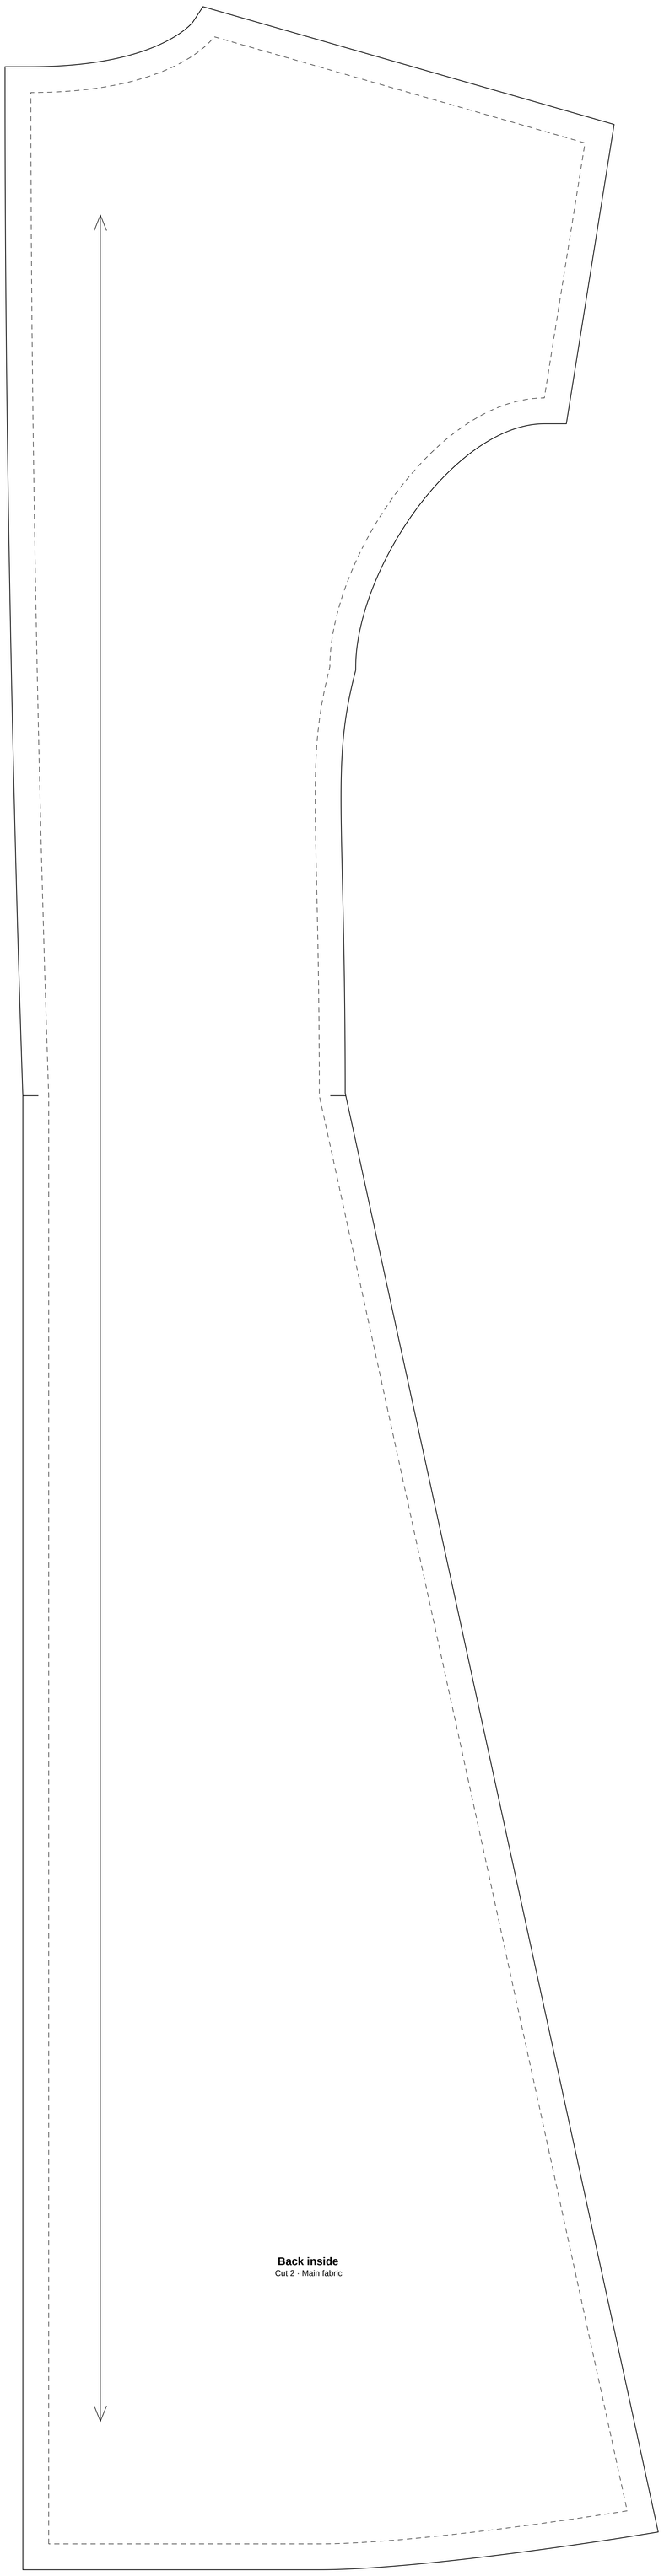

Trim along the frame on the left and top of each page, except in column 1 and row A. Butt each page against its neighbours so the diamonds and page letters match, then tape them together.
